# 020897- LEVEL GAUGE GLASS 250 X 34

The 020897- LEVEL GAUGE GLASS 250 X 34 is a precision-engineered component designed for accurate fluid level indication in tanks, vessels, and pipelines across a wide range of industrial applications. With its dimensions of 250 x 34, this gauge glass provides a clear and reliable visual indication of liquid levels, allowing for easy monitoring and control in both pressurized and non-pressurized systems. It plays a vital role in ensuring operational safety and system efficiency by enabling real-time level observation.

Constructed from high-quality, heat-resistant, and pressure-tolerant materials, the 020897- LEVEL GAUGE GLASS 250 X 34 is built to withstand the challenges of harsh environments. It is particularly suited for industries such as oil and gas, chemical processing, power generation, and water treatment, where exposure to corrosive fluids and extreme operating conditions is common. The rugged construction ensures long-term durability and dependable performance, even under continuous operation.

The 020897- LEVEL GAUGE GLASS 250 X 34 is designed for seamless integration into existing industrial systems, with compatibility across a wide range of gauge assemblies and installation configurations. Its crystal-clear visibility ensures that operators can easily monitor fluid levels, reducing the risk of overfilling, dry running, or other system malfunctions. This helps to maintain operational efficiency, reduce maintenance downtime, and improve overall system reliability.

With its robust build and reliable performance, the 020897- LEVEL GAUGE GLASS 250 X 34 is an essential component for fluid level monitoring. Its ease of use, long service life, and high resistance to mechanical and chemical stress make it a preferred choice for professionals seeking dependable solutions for accurate and efficient level indication in demanding industrial settings.
