

Asea Eh 9-10 Contactor 25A 660V

The ASEA EH 9-10 Contactor 25A 660V~ is a compact and durable control device designed for efficient switching of electrical loads in industrial and commercial applications. With a continuous current rating of 25A under AC-1 utilization and voltage capacity up to 660V~, this contactor offers reliable performance in motor control panels, automation systems, and power distribution units. Built to IEC 158-1 and VDE 0660 standards, the EH 9-10 is engineered for long-term operation and electrical safety, making it ideal for demanding environments.

Key Features:

- Rated for 25A AC-1 with maximum voltage of 660V~
- Compact design suitable for space-limited control cabinets
- Includes 1 normally open auxiliary contact for versatile circuit logic
- Coil rated at 110V 60Hz for control circuit compatibility
- Built to international standards for electrical performance and safety

Specifications:

- Model: ASEA EH 9-10
- Rated Current (Ith / AC-1): 25A
- Voltage Ratings: 25A @ 660V~, 20A @ 500V~, 20A @ 660V~
- Auxiliary Contact: 1NO

- Coil Voltage: 110V 60Hz
- Standards: IEC 158-1, VDE 0660
- Product Code: SK 812 001-AE
- Country of Origin: Made in Sweden
- Weight: 400 grams

The ASEA EH 9-10 Contactor delivers dependable and efficient switching for a range of electrical systems. Its solid construction, compliance with global standards, and reliable coil performance make it a trusted solution for engineers and maintenance teams requiring compact and robust contactors for industrial automation and control applications.
