

Ansalod Sistemi 1000010052 Plc Module

The Ansaldo Sistemi 1000010052 PLC Module is a compact and reliable control module designed for integration into programmable logic controller (PLC) systems within industrial automation environments. Developed by Ansaldo Sistemi Industriali S.P.A., this ECS PCB module, identified as the CAROX LAMP type, plays a vital role in monitoring and control functions, ensuring operational stability in complex process systems.

Key Features:

- Robust PLC module for integration with industrial automation systems
- CAROX LAMP type board designed for specific ECS PCB control tasks
- Ensures stable operation and consistent signal processing
- Compact, lightweight design ideal for space-limited control panels
- Manufactured by Ansaldo Sistemi with a focus on reliability and quality

Specifications:

- Model/Code: 1000010052
- Type: ECS PCB – CAROX LAMP
- Application: PLC systems, automation panels, process control
- Manufacturer: Ansaldo Sistemi Industriali S.P.A.

- Country of Origin: Italy
- Weight: 70 g

Engineered for dependable performance, the Ansaldo Sistemi 1000010052 PLC Module supports efficient control and monitoring in automated industrial systems. With its precise design and durable construction, it is a trusted choice for ensuring operational continuity in high-demand environments.
