

Bently Nevada 135813-01 Display Interface I-O Module 3500-93

The **Bently Nevada 135813-01 Display Interface I/O Module** is an essential component of the 3500/93 System Display, enabling seamless communication between the monitoring system and the visual interface unit. Designed to deliver real-time system data to operators, this module ensures precise and reliable information transfer for diagnostics and operational insights in critical industrial environments.

Key Features:

- Interfaces directly with the 3500 Series machinery protection system
- Enables high-speed communication with the 3500/93 display units
- Designed for dependable operation in demanding industrial applications
- Supports continuous data updates for accurate on-screen system monitoring
- Compact and rugged build for integration into control cabinets

Specifications:

- Manufacturer: Bently Nevada
- Model: 135813-01
- Compatible System: 3500 Series / 3500/93 Display
- Part Numbers: Label P/N 106M2686-00, KCC-REM-BNL-3500, 125346-01 H

- Compliance: Designed and assembled in the USA
- Application: Display interface I/O communication module
- Weight: 380 gm

The **Bently Nevada 135813-01 I/O Module** is a reliable and critical interface solution that enhances the functionality of the 3500/93 display system. By facilitating accurate and continuous communication, it ensures operators have access to vital system performance data, supporting proactive maintenance and operational safety.
