

As Electronics E-2442-B Printed Circuit Board Rev: 007

The **AS Electronics E-2442/B Printed Circuit Board (Rev: 007)** is a high-quality electronic control board designed for precise signal processing and system integration in industrial environments. Built to deliver stable performance, this board features a compact layout with reliable electronic components, making it suitable for use in automated control systems and electronic assemblies. Its robust design ensures long-term durability and operational efficiency.

Key Features:

- Reliable printed circuit board for industrial electronic applications
- Engineered for consistent signal handling and system control tasks
- Features AMS 12 Variante 2 architecture for versatile use
- Constructed for dependable operation in automation environments
- Clearly marked with revision and part identifiers for easy tracking

Specifications:

- Model: E-2442/B
- Revision: 007
- Manufacturer: AS Electronics
- Part Numbers: 1 951 0673 / 40033 009

- AMS Version: AMS 12 Variante 2
- Manufacturing Date Code: 03/09
- Identifier: 02949 110027538
- Application: Control systems, signal processing, industrial electronics
- Weight: 240 grams

The **AS Electronics E-2442/B PCB** (Rev: 007) combines robust engineering with proven reliability, making it a trusted component in electronic systems requiring stable performance and efficient control. Suitable for OEM replacements or custom automation setups, it reflects AS Electronics' commitment to quality and durability.
