

## AUTOATIC POWER 9001-0317 PHOTO CELL

The Automatic Power 9001-0317 Photo Cell is a reliable and efficient lighting control device designed to automatically switch lighting systems on and off based on ambient light levels. This photo cell from Automatic Power ensures energy savings and convenience by detecting natural light and activating connected lights only when needed. Its precise sensitivity and quick response make it ideal for outdoor lighting applications, such as streetlights, parking lots, and security lighting.

With the part number 9001-0317, this Automatic Power photo cell offers robust construction to withstand various weather conditions, including rain, wind, and temperature fluctuations. Its durable housing protects the internal components, ensuring long-lasting performance and minimal maintenance. The device is engineered to provide consistent operation, helping to extend the life of lighting fixtures by preventing unnecessary usage.

The Automatic Power 9001-0317 Photo Cell is easy to install and compatible with a wide range of lighting systems. Its reliable performance contributes to improved safety and energy efficiency in residential, commercial, and industrial environments. By automatically managing lighting schedules based on daylight availability, this photo cell helps reduce electrical costs and supports sustainable energy practices.
