

Abb Dsqc3041 Switching Power Supply A170S400B 100-240V 4.6A 50-60Hz

The **ABB DSQC3041 Switching Power Supply A170S400B** is a high-efficiency power supply unit designed to provide reliable DC power for industrial control systems, particularly within robotic and automation applications. Manufactured by Delta Electronics for ABB, this power supply delivers a stable 24.5V output at 16.3A, making it ideal for powering PLCs, servo drives, and control modules. With universal AC input compatibility ranging from 100 to 240V and a rugged build suited for demanding environments, the DSQC3041 ensures dependable performance in both standard and high-load conditions.

Key Features:

- Wide input voltage range (100–240V AC) for flexible global operation
- Delivers 24.5V DC at 16.3A output for powering industrial control systems
- Robust construction and high-efficiency design ensure long service life
- Engineered for integration with ABB automation and robotic platforms
- Manufactured by Delta Electronics, a leader in power conversion technology

Specifications:

- Product Name: ABB DSQC3041 Switching Power Supply
- Model Number: A170S400B
- Input Voltage: 100–240V AC

- Input Current: 4.6A
- Frequency: 50/60Hz
- Output Voltage: 24.5V DC
- Output Current: 16.3A
- Associated Part Numbers:
 - DSQC3041 Art No: 3HAC063913-001 Rev 08
 - DSQC3035 Art No: 3HAC059142-001 Rev 04
- Certification: E191395
- Manufacturer: Delta Electronics, Inc. (for ABB)
- Origin: Made in Thailand
- Weight: 4.620 kg

The **ABB DSQC3041 A170S400B Switching Power Supply** is a reliable and efficient solution for maintaining uninterrupted power in automation systems. Its durable design, high-current capacity, and compatibility with ABB control modules make it an essential component for mission-critical industrial operations. Trust ABB and Delta Electronics for performance-driven power solutions tailored to the demands of modern automation.
