

Bxc-1 Printed Circuit Board 7221-184.0005

The **BXC-1 Printed Circuit Board** (Part No: **7221-184.0005**) is a compact and efficient electronic control component designed for integration into industrial and automation systems. Built for reliable signal handling and control logic operations, this PCB supports consistent performance across various equipment configurations.

Identified by its model and part number combination — **BXC-1 / 7221-184.0005** — the board is structured to manage electronic interface functions with a streamlined layout, optimizing performance in space-constrained environments. Its lightweight design enhances ease of installation and versatility for retrofitting or OEM applications.

Key Specifications:

- **Model:** BXC-1
- **Part Number:** 7221-184.0005
- **Function:** Control/Interface PCB
- **Weight:** 70 g

Ideal for use in electronic control systems, the BXC-1 board ensures dependable operation with minimal footprint, making it suitable for various control panel or automation module integrations.
