

BANDO 189J A1 SSR-1.5 POLY V- BELT 155 X 14

The BANDO 189J A1 SSR-1.5 POLY V-BELT 155 X 14 is a premium power transmission component engineered to deliver superior performance in compact and high-speed industrial applications. Designed with precision by BANDO, this Poly V-belt offers a unique combination of flexibility, strength, and stability, making it ideal for a wide range of machinery where space efficiency and power density are critical.

With a size of 155 X 14 and the part number 189J A1 SSR-1.5, this belt provides excellent torque transmission and smooth operation across multiple pulleys. The Poly V design ensures reduced vibration and noise, which contributes to quieter machine performance and enhanced workplace comfort. Its advanced rubber compound and ribbed profile offer excellent wear resistance, even under continuous and demanding loads, extending service life and reducing downtime.

The BANDO 189J A1 SSR-1.5 POLY V-BELT 155 X 14 is optimized for use in HVAC systems, washing machines, conveyors, and industrial power tools. It performs exceptionally well in environments where high-speed rotation and compact belt drives are essential. The multi-ribbed design enhances grip and load distribution, ensuring efficient energy transfer and minimizing slippage, even during peak operation.

Backed by BANDO's reputation for quality and innovation, the 189J A1 SSR-1.5 POLY V-BELT 155 X 14 delivers consistent performance, easy installation, and compatibility with a variety of pulley systems. Whether used in OEM setups or maintenance replacements, it supports optimal machinery function and lowers total cost of ownership. This belt is a trusted choice for industrial users seeking reliability, durability, and performance from their drive components.
