

Abb Dstk153 Ribbon Cable

ABB DSTK153 Ribbon Cable - 3BYN263905-E Interface Cable Assembly

The ABB DSTK153 ribbon cable is a high-quality interface connection component designed for integration within ABB automation and control systems. Engineered with precision, this ribbon cable ensures reliable data and signal transmission between electronic modules or printed circuit boards. It features a multi-pin connector layout for secure and efficient connectivity, supporting high-speed operations in industrial environments.

Key Features:

- Ribbon cable assembly for ABB Farcom systems
- Model: DSTK153
- Connector Interface: 1004-5562-CA
- ABB Part Number: 3BYN263905-E
- Ideal for data, signal, or I/O interconnections in control modules
- Durable and flexible cable structure to withstand repeated use

Specifications:

- Manufacturer: ABB
- Product Type: Ribbon Cable
- Part Numbers: DSTK153 / 3BYN263905-E / 1004-5562-CA

- Marking Code: E020904
- Construction: Flat ribbon layout with precision-molded connectors
- Application: Industrial automation and signal interfacing
- Weight: 290 Gm

The ABB DSTK153 ribbon cable offers robust and consistent performance, making it suitable for critical control system linkages, particularly within ABB's Farcom hardware and industrial interface setups.
