

## **Avk Cosimat N+ 89935085-017 Voltage Regulator 250-500 Vac**

The **Avk Cosimat N+ 89935085-017 Voltage Regulator** is a precision-engineered device designed to maintain stable voltage levels within industrial electrical systems. With a wide operating input range of 90-250 Vac and output capability from 250 to 500 Vac, this voltage regulator is ideal for applications requiring consistent power quality and protection against voltage fluctuations. Manufactured in Germany, the Avk Cosimat N+ offers high reliability and robust performance, making it suitable for critical automation and power management environments.

### **Key Features:**

- Wide input voltage range: 90-250 Vac
- Output voltage regulation between 250-500 Vac
- Advanced automatic voltage regulation for stable power supply
- Durable design ensuring long-term reliability in industrial settings
- Manufactured to high-quality German engineering standards

### **Specifications:**

- Model Number: 89935085-017
- Type: Avr-front, Rev. New
- Input Voltage: 90-250 Vac

- Output Voltage: 250-500 Vac
- Weight: 2.230 Kg
- Made in Germany

The **Avk Cosimat N+ 89935085-017 Voltage Regulator** delivers consistent voltage control essential for protecting sensitive electrical equipment and ensuring smooth operation across various industrial automation systems. Trusted for its performance and precision, this regulator is a reliable component for power stabilization in demanding electrical environments.
