

Baco Za5 Emergency Stop Pushbutton

Baco ZA5 Emergency Stop Pushbutton - Durable Safety Control Solution

The Baco ZA5 Emergency Stop Pushbutton is a robust and reliable safety device designed to provide immediate shutoff in critical situations across industrial environments. Engineered for compliance with global safety standards, this emergency stop unit is ideal for use in control panels, machinery, and automation systems. Featuring a durable construction with a bright, easy-to-identify actuator, the ZA5 model ensures rapid response when safety is paramount.

Key Features:

- Reliable emergency stop mechanism for industrial safety applications
- High-visibility actuator for quick identification and operation
- Compatible with standard industrial control enclosures
- Rugged build designed for harsh operating conditions
- Easy installation with modular assembly (Auxibox + C20ER01 + ZA5)

Specifications:

- Brand: Baco
- Model: ZA5 Emergency Stop Pushbutton
- Contact Rating: A600 / P300
- Product Reference: M422950, BX17301-BC

- Configuration: Includes Auxibox + C20ER01 + ZA5 components
- Origin: Made in France
- Weight: 90 g

Trusted for its safety-first design, the Baco ZA5 Emergency Stop Pushbutton delivers exceptional performance in emergency shutdown systems. Its reliable operation and durable construction make it an essential component in any industrial safety architecture.
