

Ati 109-49300-00 Video Graphic Card Ver 2.0 Class B

The ATI 109-49300-00 Video Graphic Card Ver 2.0 Class B is a compact and efficient graphics solution designed by ATI Technologies Inc. Built for stable and consistent video output, this card is engineered to meet Class B emission standards, making it suitable for use in professional computing environments that demand low electromagnetic interference. With its reliable 94V-0 rated PCB and precision manufacturing, it offers dependable performance for embedded systems and industrial computing applications.

Key Features:

- Compact video graphics card for stable image processing and output
- Class B compliant for reduced electromagnetic interference
- Built on a 94V-0 flame-retardant PCB for enhanced durability and safety
- Manufactured by ATI Technologies Inc., known for high-quality video solutions
- Lightweight and ideal for space-constrained system designs

Specifications:

- Model: 109-49300-00
- Version: 2.0
- AMC P/N: 109-49300-00

- Compliance: ICES-003 Class B
- PCB Rating: 1V-0 / 94V-0 E69038(S)
- Manufacturer Part Number: 1024930501531062
- Origin: Made in China
- Weight: 80 g

With its small footprint and reliable output capabilities, the ATI 109-49300-00 Video Graphic Card is an excellent choice for systems requiring efficient video performance without sacrificing space or compliance standards.
