

Bauser 630 632 Hour Counter Monitor 230V 60Hz

Bauser 630.632 Hour Counter Monitor - 230V AC, 60Hz (New)

The Bauser 630.632 Hour Counter Monitor is a compact and precise time-tracking device engineered to monitor operating hours of machinery and equipment across industrial and commercial settings. Powered by a 230V AC, 60Hz input, this hour meter offers reliable performance for tracking usage cycles, maintenance intervals, and operational efficiency. With a durable construction and a clear mechanical display, the 630.632 model is ideal for control panels, generators, pumps, and other industrial equipment.

Key Features:

- Accurate hour monitoring for equipment and machinery
- Operates on 230V AC, 60Hz for compatibility with standard industrial power supplies
- Mechanical display ensures visibility and reliability over extended use
- Compact design suitable for panel or flush mounting
- Manufactured in Germany for trusted quality and durability

Specifications:

- Model: 630.632
- Input Voltage: 230V AC
- Frequency: 60Hz

- Display Type: Mechanical hour counter
- Application: Industrial equipment, generators, control panels
- Mounting: Panel mount
- Manufacturing Code: 0709
- Weight: 50 g
- Country of Origin: Germany

The Bauser 630.632 Hour Counter Monitor provides dependable and accurate tracking of operational time, essential for preventive maintenance and equipment lifecycle management. Its German-made precision and rugged design make it a trusted solution in various industrial environments.
