

APEM 2641A L ROCKER SWITCH SERIE 2600 110V 2MA - SET OF 02 PCS

The APEM 2641A L ROCKER SWITCH SERIE 2600 110V 2MA - SET OF 02 PCS is a premium-grade electrical control component crafted for precision, reliability, and long-term performance. This rocker switch set is part of APEM's distinguished 2600 Series, known for its durability and high electrical efficiency in a wide range of demanding environments. Designed to handle a voltage rating of 110V and a current rating of 2mA, these switches are ideal for applications requiring low current activation with maximum responsiveness and safety.

Each 2641A L switch in the set features a streamlined rocker mechanism, offering smooth tactile feedback for consistent operation. The ergonomic design allows for easy actuation with minimal force, making it suitable for both industrial and consumer interfaces. The robust construction ensures long mechanical life and superior resistance to wear, vibration, and environmental factors such as dust and moisture, ensuring uninterrupted performance across various operational conditions.

The APEM 2641A L ROCKER SWITCH SERIE 2600 is built with high-quality materials and a compact housing, allowing easy integration into panels, control boards, and enclosures. Its electrical reliability is enhanced by precise contact mechanisms that reduce arcing and contact wear, making it suitable for sensitive electronics or applications requiring stable low-current switching. This set of two pieces provides added value for systems requiring dual switching points or redundancy in control design.

Engineered for versatility and ease of installation, these rocker switches are ideal for use in automotive electronics, instrumentation panels, communication systems, and a variety of industrial control setups. The APEM 2641A L ROCKER SWITCH SERIE 2600 110V 2MA - SET OF 02 PCS delivers a combination of advanced functionality and dependable performance, reflecting APEM's commitment to quality and innovation in electrical switching technology.
