

## **Bartec 05-00030006600 Illuminated Green Pushbutton**

The **Bartec 05-00030006600 Illuminated Green Pushbutton** is a high-quality control interface component designed for use in industrial environments where visibility, reliability, and safety are critical. This illuminated pushbutton features a vibrant green lens for clear signaling and intuitive operation, making it ideal for control panels, operator stations, and machinery interfaces. Built to meet the stringent demands of hazardous or high-performance settings, the Bartec TG pushbutton combines robust construction with dependable switch functionality to support continuous operation in challenging conditions.

### **Key Features:**

- Illuminated green pushbutton for clear operator indication and status signaling
- Engineered for industrial applications requiring high reliability and visual clarity
- Compact and lightweight design facilitates easy installation in control panels
- Durable construction suitable for harsh or hazardous-area environments
- Backed by Bartec's trusted quality in explosion protection and industrial components

### **Specifications:**

- Product Name: Bartec TG Illuminated Pushbutton
- Order Number: 05-00030006600

- Color: Green
- Illumination: Integrated for enhanced visibility
- Application: Industrial control panels, machinery, operator interfaces
- Weight: 50 grams

The **Bartec 05-00030006600 Illuminated Pushbutton** is a dependable and user-friendly component built for safety-critical applications. Known for precision engineering and exceptional durability, Bartec delivers trusted solutions for industrial automation and hazardous area controls. Whether used in process plants, manufacturing systems, or custom control units, this illuminated green pushbutton ensures intuitive operation and long-lasting performance.
