

Ametek Mpc 140 Bar Pressure Calibrator Kit

The **Ametek MPC 140 Bar Pressure Calibrator Kit** is a high-precision, portable hydraulic testing instrument designed for professional pressure calibration in marine, industrial, and process control environments. Manufactured by Ametek Test and Calibration Instruments in collaboration with Takashima Keiki Co., Ltd, this calibrator delivers accurate pressure testing up to 140 bar (2000 psi), with capability extending to oil-based systems rated at 200 bar. Compact and battery-powered, it operates efficiently with a 9V alkaline battery and consumes only 150 mW, making it ideal for field use and demanding calibration tasks.

Key Features:

- Portable hydraulic pressure calibrator with maximum capacity of 140 bar / 2000 psi
- Designed for marine, oil, and process industry calibration applications
- Operates on a single 9V alkaline battery with low power consumption (150 mW)
- Equipped with dual pressure gauges: 0–15 kg/cm² and 0–3000 psi for precise readings
- Manufactured by Ametek and Takashima Keiki, known for durable and accurate calibration equipment

Specifications:

- Model: MPC 140 Bar
- Type: System 2, Oil 200 Bar

- Max Pressure: 140 bar / 2000 psi
- Power: 1 x 9V alkaline battery
- Power Consumption: 150 mW
- Pressure Gauges: 0–15 kg/cm² (D1202538), 0–3000 psi (T-648)
- Application: Marine, hydraulic, and industrial pressure testing
- Origin: Ametek / Takashima Keiki Co., Ltd
- Weight: 4.070 kg

The **Ametek MPC 140 Bar Pressure Calibrator Kit** offers rugged portability, high accuracy, and trusted performance for technicians and engineers working in high-pressure system calibration. Whether in marine environments or industrial maintenance operations, this calibrator ensures precise control and diagnostics for optimal system reliability.
