

Abb 1200-1A Digital Panel Meter 0-1-2,4 Ka

The **ABB 1200/1A Digital Panel Meter** is a compact and accurate measurement device designed to monitor electrical current levels in industrial applications. With a display range from 0 to 2.4 kA, it enables precise tracking of high current values, making it ideal for integration in power distribution panels and control systems.

Key Features:

- Digital panel meter for current measurement up to 2.4 kA
- Engineered for clear visibility and accurate real-time readings
- Suitable for electrical panels, switchgear, and automation systems

Specifications:

- Model: **1200/1A**
- Measurement Range: **0-1/2.4 kA**
- Display Type: **Digital**
- Manufacturer: **ABB**
- Weight: **390 Gm**

This ABB 1200/1A digital panel meter is a reliable solution for industrial environments requiring consistent monitoring of high current levels, contributing to system safety and performance efficiency.
