

ASTRAL POOL ASTRAL SPRINE 38776 WATER PUMP

CAPACITY- 21.5 m³/h HEAD- 10 mca

ASTRAL POOL “ASTRAL SPRINE 38776” water pump delivers reliable, high-efficiency pool circulation with a capacity of 21.5 m³/h and a discharge head of 10 mca (meters of column of water). Tailored for residential and commercial pool systems, this pump supports optimal water turnover rates while ensuring even filtration and distribution. With its balance of performance and compact design, it seamlessly fits into pump rooms without compromising flow efficiency.

Crafted from durable, corrosion-resistant materials, the ASTRAL SPRINE 38776 features a precision-engineered impeller and volute casing that minimize hydraulic losses and boost energy efficiency. The 10 mca head provides sufficient lifting power for standard filtration loops, skim and return setups, and auxiliary water features like fountains or spouts. Ingeniously balanced internals reduce vibration and noise, offering quiet operation and extended service life essential for user comfort and continuous duty.

Installation and maintenance are user-friendly: the pump includes standardized inlet/outlet flanges compatible with common pool plumbing, allowing seamless integration and quicker retrofits. A removable lid and clear strainer housing simplify access to the filter basket—making debris removal or component inspection fast and tool-free. Built-in thermal protection enhances motor reliability, while easily replaceable seals and bearings streamline preventive and repair maintenance.

Ideal for pool builders, maintenance professionals, and homeowners seeking dependable circulation, the ASTRAL POOL ASTRAL SPRINE 38776 combines hydraulic efficiency, ease of operation, and robust construction. Whether deployed in private pools, community leisure centers, or hotel installations, its 21.5 m³/h capacity and 10 mca head deliver optimal performance with minimal upkeep—ensuring lasting water clarity, energy savings, and system reliability.
