

Anschutz 135-089 02 Signal Unit 065

The **Anschutz 135-089 02 Signal Unit 065** is a precision-engineered component designed for maritime navigation and safety systems. As part of the renowned NautoAlarm system by Anschutz, this signal unit ensures timely and accurate transmission of alarm and status signals critical for shipboard operations. Its compact form factor and robust construction make it ideal for integration into bridge systems where reliability and compliance with marine safety standards are paramount.

Key Features:

- Designed for integration with the Anschutz NautoAlarm safety system
- Delivers reliable signal transmission for maritime alarm functions
- Compact and lightweight for space-efficient installation
- Built to withstand harsh marine operating conditions
- Backed by Anschutz's proven expertise in marine navigation electronics

Specifications:

- Model: 135-089 02
- Type: Signal Unit 065
- System Compatibility: Anschutz NautoAlarm
- Function: Alarm and signal communication device

- Application: Maritime navigation and safety systems
- Weight: 270 grams

The **Anschütz 135-089 02 Signal Unit 065** plays a vital role in ensuring operational safety at sea. Trusted by shipbuilders and maritime operators worldwide, this signal unit reflects Anschütz's commitment to quality, precision, and regulatory compliance in marine electronics.
