

Beijer E300 Operator Interface Panel 04380A 24Vdc 450Ma

The Beijer E300 Operator Interface Panel 04380A is a rugged and reliable HMI (Human-Machine Interface) designed to provide intuitive control and monitoring in industrial automation systems. Manufactured by Beijer Electronics AB, this operator panel delivers clear visual feedback and responsive interface functionality, making it ideal for use in manufacturing, processing, and control environments. Powered by a 24V DC Class 2 power supply and rated for Class I, Division 2 hazardous locations, the E300 offers dependable performance in both standard and challenging industrial conditions.

Key Features:

- High-performance operator interface panel for real-time monitoring and control
- Operates on 24V DC power with 450mA current draw for energy-efficient usage
- Certified for Class I, Div 2 hazardous locations (Groups A, B, C, D, T4) for enhanced safety
- Durable construction ensures reliable performance in harsh industrial environments
- Intuitive design with reliable connectivity for seamless system integration

Specifications:

- Model Name: E300
- Part Number: 04380A

- Power Supply: 24V DC, 450mA (Class 2)
- Certification: Class I, Division 2, Groups A, B, C, D, T4
- Safety Listing: E207750
- Manufacturer: Beijer Electronics AB
- Product No: 0711-181
- Country of Origin: Made in Sweden
- Weight: 1.610 kg

Engineered for industrial efficiency and safety, the Beijer E300 Operator Interface Panel 04380A is a reliable solution for professionals seeking a robust and user-friendly HMI device. Backed by Beijer's reputation for high-quality industrial electronics, the E300 enhances operational control while maintaining compliance with international safety standards.
