# Ademco 4100Sm Serial Interface Module 12Vdc-25Ma

The **Ademco 4100SM Serial Interface Module** is a compact and reliable communication component designed for seamless integration into security and alarm systems. Manufactured by Ademco (a subsidiary of Honeywell), this module facilitates serial communication between control panels and peripheral devices, enhancing system expandability and functionality.

Operating at **12VDC with a low current draw of just 25mA**, the 4100SM is ideal for power-sensitive applications. Its efficient design includes compliance with industry standards such as **94V-0 flame-retardant PCB rating**, ensuring safety and performance in demanding environments. It features component identifiers like **W241963**, **N5389V2**, and **ACP-GS**, denoting its compatibility with a range of Pittway and Ademco systems.

**Key Specifications:**

- **Model:** 4100SM

- **Function:** Serial Interface Module

- **Power Supply:** 12VDC / 25mA

- **PCB Rating:** 94V-0 (flame retardant)

- **Identifiers:** W241963, N5389V2, ACP-GS

- **Manufacturer:** Ademco / Pittway Corporation

- **Weight:** 80 g

This module is an essential interface solution for professionals seeking dependable serial connectivity in security and automation networks.
